## Introduction

### Introduction

Macrack (Australia) Pty Ltd has been manufacturing and installing pallet racking and warehouse storage systems for **over 30 years**. Our staff are highly qualified and can offer the very best solutions for what you or your clients need in regards to warehousing solutions and storage maximisation.

### Lifetime Warranty

Our product has a **lifetime warranty**. As we have been manufacturing for 30 years, we have total confidence in our product. The Macrack system is designed and engineered to last, unlike some other racking systems thus we proudly offer this warranty.

### Standards

All of our products conforms to the latest standards;

**AS4084 – 2012** Australian Steel Storage Racking Code

**AS/NZS 4600:2005** Cold-Formed Steel Structures Code.

### Customised & Standard Solutions

Our success is based upon **listening to customers**, understanding their individual needs and providing a product tailored to meet their requirements. Whether you need just the standard racking or something customised to suit your exact needs. We will listen and give you the solution you want.

### Free Quote & Design

Let us help you design your warehouse to reach its full potential. Macrack supplies companies all over Australia with some of the highest quality racking available in the country. We are happy to give you a quote on both supply and installation where ever you may be located. **Contact us for your free quote.**

### Australian Made

We have been manufacturing from our Mansfield (Brisbane) plant for 30 years. We are truly proud to be one of few remaining **Australian manufacturers of pallet racking**. Furthermore because of this fact we have a much quicker turn around than our competitors and can create custom items for our clients.

## Product Range

### Selective (Pallet Racking)

Selective pallet racking is the most common form of Industrial storage systems in use today, Macrack are specialists in manufacturing pallet racking to suit your specific needs.

Pallet Racking can be called various things including: Long Span Shelving, Steel Shelving, Warehouse Shelving, Bulk Storage Racks.

### Raised Storage Areas (Mezzanine Flooring)

Utilising standard racking components all raised storage areas are engineered and built for absolute safety.

Raised storage areas are customisable to suit your needs. Double or triple your floor area with a Raised storage area, which comes complete with staircases and handrails.

Raised storage areas can be aligned to meet your exact equipment and as an added advantage, can be either extended or relocated when requirements change.

## Macrack

### Cantilever Racking

Cantilever racking is ideal for storing long, irregular or awkward shaped product.

Macrack cantilever racks offer a cost effective system, in both a single sided or double sided format, suiting your every requirement. This variety of racking suits the storage of timber, steel lengths, board and extrusions.

### Drive-in Racking

'Drive-in' high density pallet racking requires fewer aisles.

The rack is designed so that a forklift can have access to the operating side (LIFO). 'Drive-in' racks are most suitable for storage of pallets of similar products.

### A-Frame

A-frame racks are designed for long flexible product, such as conduit, mouldings and other extrusions.

This rack suits product from 2m to 5m long and allows easy separation between variations of items, as well as single sided or double sided configuration.

## Macrack

### Heavy Duty Shelving

Macrack provides heavy duty shelving systems using a rack style upright, providing an exceptionally robust unit.

There is no bolting required and these shelving units can be erected or dismantled in minutes without the use of tools.

### Carpet Racking

Macrack carpet racks are designed to provide instant access to every roll of carpet or vinyl.

These can be combined with mesh decking or ply board, depending on your needs.

### Cable Racking

Cable racks are purpose built to store cable drums. This type of rack also allows the drum to be unwound for ease of access to the product.

This simple, easy to use system is the perfect solution for 1 drum to 100 drums, and caters for many shapes and sizes.

## Macrack

### Work Benches

Macrack understands warehousing, which is why we have developed heavy duty workbenches, for tough environments.

These benches can be fixed or on castors, have a backing or be 360 degrees accessible, have shelves or be open underneath. The options are yours to decide.

Made from Macrack frames and beams, and strong ply bench tops, these are built to last even on your factory floor.

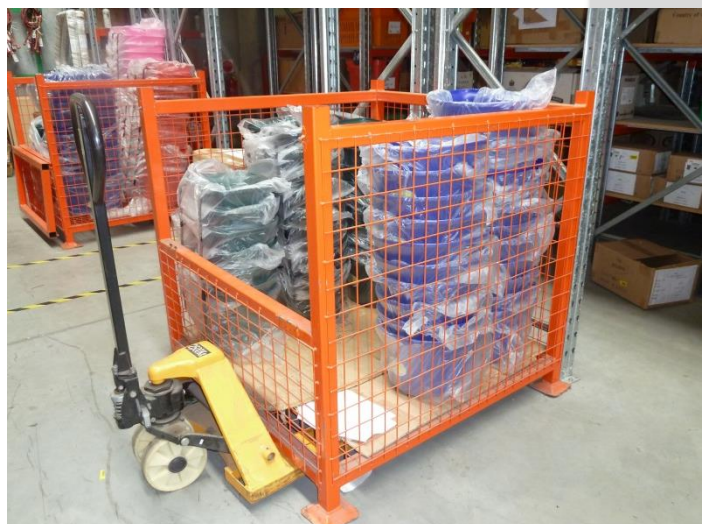

### Stillage's

Macrack pallet cages and stillage's are individually designed and manufactured to ensure ease of transportation and storage of your particular products. Our Pallet cages and stillage's are easily maneuvered to and from production and site.

Customizations we commonly do include:

- Sizes
- Weight loads
- Gates (sideways and drop down)
- Stackable
- Mesh or sheet steel walls
- Locking
